## Young Line – Child safety systems

Safety, ergonomics and comfort – right from the start with RECARO

Collection 2007/08

Right from the start with RECARO

## Because your child is worth it: RECARO.

The primary function of a child seat is to provide optimal protection in the vehicle. Most child restraint systems available on the market satisfy this requirement. Our RECARO Young Line, however, takes a more logically consistent approach. With maximum safety for your child firmly in place, we then turn our attention to other issues that help children enjoy their seat. What good is even the best seat – whether in the car or at home – if your child doesn't like it?

With 100 years of company history and long-standing experience in high-quality vehicle seat construction – from the professional racing shell through to the production of standard seats for renowned vehicle manufacturers – we know how to make sitting a pleasure – even for our smallest customers. The materials, design and technical highlights (e.g. the RECARO Sound System in the RECARO Start and the RECARO Monza Seatfix/Monza) ensure a comfortable ride - for young and old. What's more, your child is sitting in a genuine "RECARO" – a really special feeling.

Safety, ergonomics, design, comfort and quality – these were the catchwords we used in the performance specification for our developers, designers and engineers. The result was an unrivalled child seat range. Like their big brother the car seat, all products in the RECARO Young Seats range are distinguished by their excellent features. Only at RECARO are all child seats treated like car seats and tested in accordance with the stringent requirements of the automotive industry. What's more, we use only innovative and high-quality materials. The RECARO Start is the world's first child seat to have a tubular aluminium frame construction and an integrated sound-system.

Because children love variety and know exactly what they want, we have created a range of seat covers to suit every taste. RECARO sees timelessness and durability as paramount. This ensures your child will continue to like the seat and guarantees acceptance by older children too. All fabrics and materials are subjected to stringent test procedures and are consistently tested for pollution, colour fastness and most importantly, sitting comfort.

**Our seats are not designed by cutting cost-saving corners that inevitably compromise safety, user friendliness and sitting comfort for your child. Decide for yourself what your child is worth.**

Another genuine RECARO: RECARO Sportster CS.

## Without doubt the best decision: RECARO.

There are significant differences in terms of safety and comfort among the numerous child seat systems currently available on the market. Not all child seats are equally effective in every vehicle, you must therefore ask yourself the question: "Which seat is the right one for our child?" The answer has to be: A RECARO – without doubt the best decision.

The "right" child seat is distinguished by several important factors. As age is regarded as a guide only, the seat must be perfectly matched to the weight of the child. However, child seat and vehicle must also be perfectly coordinated as only then is optimal safety guaranteed. **We always recommend that you take your child for a sitting and fitting session at your dealer. You will quickly see whether the seat fits the vehicle and whether or not your child likes it. You must always ensure that your child is not at risk from the airbag!** The rear seat bench is without doubt always the best place for the child seat.

Investigations carried out by the German Association of Transport Underwriters (GDV) show that two out of three children are not correctly secured. In 96.1 % (!) of cases, this is due to the incorrect fitting of child seats. The consequences, in the event of an accident, can be serious.

To make sure this never happens, we have concentrated on easy operation and simple use of seats inside the car. It goes without saying that all RECARO Young Seats are subjected to numerous crash tests – with maximum requirements for safety. For RECARO, the Crash Standard "ECE-R 44/04" often quoted by child seat manufacturers is only one of the conditions to be satisfied. A 24 month warranty goes without saying.

The new RECARO Isofix system is an extremely safe and comfortable alternative. This enables, the two seats RECARO Young Profi plus (ECE group 0+) – (which was lately confirmed in a test carried out by the ADAC to meet high safety standards 1.3) – and the RECARO Young Expert plus (ECE group I) can be quickly and easily fixed in the car. The standardised mounting points in the vehicle easily anchor the platform onto the locations provided (vehicle must be factory-fitted with Isofix). The seats are then firmly connected to the platform by this proprietary mechanism. It is then no longer necessary to fasten the seat using the 3-point standard seat belt but is, however, also available as an alternative.

Regardless of which RECARO Young Seat you choose, you can be sure that nothing is closer to our hearts than safe driving pleasure for you and your family.

Unique: the construction principle of the RECARO Start.

## Make the right choice: RECARO.

A legal requirement, a matter of course for responsible parents: Since 1993, it has been a legal requirement for children to be secured in vehicles. This involves the use of child restraint systems constructed, tested and approved in accordance with ECE Regulation 44/03 or 44/04, which bear the ECE test mark.

The ECE standard differentiates between five different weight groups: **Group 0** (up to 10 kg, up to approx. 9 months), **Group 0+** (up to 13 kg, up to approx. 15 months), **Group I** (9 to 18 kg; from approx. 9 months to 4.5 years), **Group II** (15 to 25 kg; from approx. 3 to 7 years) and **Group III** (22 to 36 kg; from approx. 6 to 12 years).

As the right seat doesn't just have to fit, the child has to like it too, all seat models come with a range of different covers. The premium **Topline** covers are made from high quality micro fibre with characteristics reminiscent of silk, providing a unique and wonderfully soft feeling. The micro fibre covers are breathable, dirt and stain resistant and retain their original high-quality appearance and softness for the entire life of the seat.

They are extremely kind on the skin, environmentally friendly (Oeko-Tex certified) and are guaranteed to be free of harmful substances.

The suede-look **Trendline** seats made from elegant Bellini impress with their pleasant soft touch and easy to clean, hard-wearing surface, which is guaranteed to be lightfast, CFC-free and free from formaldehyde.

All covers are removable and can be machine-washed at 30° C. Of course, all materials are put through stringent tests for colour-fastness, abrasion resistance, tolerance etc. and satisfy even the most exacting requirements, e.g. DIN, FMVSS or BS.

Overview RECARO Young Seats:

# RECARO Isofix Base

**System:** mounting points for RECARO Young Profi plus and RECARO Young Expert plus

**Safety:** completely safe anchoring to the Isofix points in the vehicle

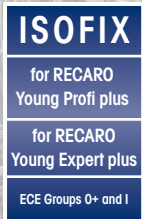

**Simple Assembly:** aids for easy installation in the car

**Certainty:** visual display indicates whether the system is correctly fitted

**Standardised:** quick and easy fitting in practically all vehicles fitted with Isofix

6000.002.66

**Trust:** floor support from robust metal, adjustable in length and therefore suitable for almost every vehicle

## Play it safe – RECARO Isofix Base.

Isofix is an international, standardised mounting system for groups 0+ and I child seats that have their own harness system. In the vehicle, appropriate Isofix anchors are permanently mounted to the body-shell. These standardised mountings enable the RECARO Isofix Base to be anchored simply and quickly. Its adjustable supports make it a safe and stable basis for the RECARO Young Profi plus (up to approx. 15 months) and the RECARO Young Expert plus (up to approx. 4.5 years).

## RECARO Isofix System – Applications

RECARO Isofix system with  
**RECARO Young Profi plus**  
(ECE Group 0+, up to approx. 15 months)

RECARO Isofix system with  
**RECARO Young Expert plus**  
(ECE Group I, up to approx. 4.5 years)

### The benefits of the RECARO Isofix System:

- Simpler handling for installing the seat in the vehicle, the chances of misfitting being greatly reduced.
- Optimal protection is provided by the direct link between system and vehicle bodyshell, irrespective of the position of the anchor points on the adult harnesses.
- The RECARO Isofix Base is also suitable for ECE Groups 0+ and I and therefore needs to be purchased only once.
- Can also be fitted using vehicles 3-point seat belt.

# RECARO Young Profi plus

Can be used with the  
RECARO Isofix Base  
**OR**  
the 3-point belt of the vehicle

**Baby seat shell that grows with the child:**

**HIGHLIGHT**

seat back can be adjusted 5 times, optimal adjustment to the size of your child

**Comfort and safety:** lightweight, highly stable shell

**Impact safety:** double side impact protection and additional seat reducer firmly attached to the shell for maximum protection of the head on side impact

**Safety plus:**

**HIGHLIGHT**

the variable back enables the harness system to grow with the child

**Safety:** reflecting outer edges of the seat offer improved safety

**Ergonomic:** special carrying handle for comfortable transportation

**Practical:** removable, two-layer sun canopy for increased UV-protection

**Travel comfort:** comfortable padding – for long journeys

**Impact safety:** extra high side wings for optimal protection during side impact

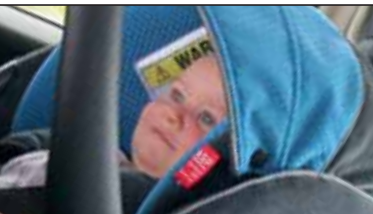

**Ergonomic features:** high-quality ergonomic foam for healthy growth

**Practical:** integrated rocker function

**TEST WINNER**  
Accident safety  
(1,3)

**High-quality cover materials:** from innovative, trendy microfibre or fashionable Bellini. All covers are removable and can be machine-washed at 30° C.

Also available as „Travel System“ RECARO Young Travel with Stroller (page 24-25).

**ECE**  
**0/0+**  
up to 13 kg  
up to approx. 15 months

**The infant carrier for maximum safety – RECARO Young Profi.**

Like its big brother, the RECARO Profi racing shell, the continuously adjustable, robust RECARO Young Profi plus baby shell – despite its light weight – provides maximum safety for your child in the car. The comfort padding, ergonomic foam, ergonomic carry handle and practical rocker function ensure guaranteed fun for large and small. **Can be fastened in the vehicle using the RECARO Isofix Base or the 3-point harness.**

# RECARO Start

**UNIQUE – RECARO Sound System:** **HIGHLIGHT**  
integrated speakers for individual audio programme

**Impact safety:** shoulder support for optimal lateral stability when taking a corner

**Expandable:** variable height, shoulder width and seat cushion length ensure an ergonomic and comfortable sitting position

**Travel comfort:** an open **HIGHLIGHT** construction and breathable fabrics for a journey in comfort

**Safety plus:** for ECE Group I, we recommend the use of the impact cushion (accessory)

**Special shape:** an anti-submarining ramp prevents the child slipping under the safety belt in a crash

**Time out\*:** a tilt adjustment changes the seat into its reclined position

\*The recline position is intended exclusively for ECE Groups I – II (for children from approx. 9 months to 6 years, 9 – 25 kg) and must not be used above this weight (ECE Group 3 child).

**Comfort and safety:** correctly shaped, fixed headrest for better support and comfort when resting, with additional protection in case of a side-on collision

**Safety plus:** belt guide can be set and varied so the belt glides perfectly, every time

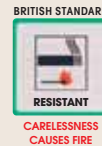

**Compact and easy to transport:** just fold the backrest forward and the seat can be stowed away

**HIGHLIGHT Safety plus – Aluminium frame construction:** bends on impact, absorbing energy in an accident

**High-quality cover materials:** from innovative, trendy microfibre or fashionable Bellini. All covers are removable and can be machine-washed at 30° C

**Easily fitted:** simply secure the seat with the car's own 3-point seat belt

**HIGHLIGHT Extremely long useful life:** 1 seat for children from approx. 9 months up to 12 years (9 - 36 kg)

## Growing up in safety – RECARO Start.

The RECARO Start offers children in ECE Groups I – III (9 – 36 kg, approx. 9 months – 12 years) the safety and comfort of an adult seat. **The RECARO Start is the world's only child seat to have a speaker integrated into the headrest.** The RECARO Sound System allows children to listen to their own audio programme, e.g. through a connected CD player (not supplied as standard) – without disrupting other passengers.

## TRAVEL SYSTEM

for RECARO Young Profi plus

Stroller

### A genuine runner – RECARO Travel System.

Before being able to stand on two legs, your child has already travelled on four wheels – in the Travel System by RECARO. The modern stroller has an extremely simple and safe mounting adapter for the RECARO Young Profi plus infant carrier. This shell was the test winner with a score of 1.3 in the current Stiftung Warentest and ADAC test for safety. This guarantees safe, uncomplicated transfer from the vehicle to the stroller.

## Staying on the right track – RECARO goes offroad.

The transition from manufacturing innovative seat equipment for premium class vehicles to developing high-quality child seats is only short. Likewise, there is no great difference between child seats and other child safety products, especially when they revolve around “seats”. That’s why RECARO has decided to continue encouraging your child in other areas too.

RECARO child seats are set apart by top-quality materials, perfected designs and the familiar RECARO features of “safety, ergonomics, design, comfort and quality”. We don’t like to settle for less and neither should you – this goes right now for RECARO’s Young Home line.

When it comes to making high chairs, the vital aspect is the material from which they are made – the wood. Because child safety products are always geared to a future for children, RECARO also attaches particular importance to the sectors that don’t yield maximum profit. The entire manufacturing process – from sawing the tree trunks right through to the final check – take place in our German production centre. This guarantees the high quality we claim and you expect. What’s more, the environment, its protection and preservation play a pivotal role throughout the entire manufacturing process.

This means that the materials used in the wood product sector are selected with great care and according to stringent ecological criteria. All wooden high chairs are produced exclusively from German beech.

This wood not only looks good but guarantees that RECARO’s “child seats” are worth the money and mean that you are buying only top quality products – unlike the inferior quality woods used by many other manufacturers.

Last but not least, RECARO is also making a direct contribution towards safeguarding a healthy future for your children. You see, the world in which your child lives should still be vital and natural tomorrow and be capable of withstanding anything – just like RECARO’s wooden high chairs.

# RECARO Young Home

**Comfort and safety:**  
with seat reducer\* for babies  
from approx. 4 months old

5-year guarantee on all wooden parts

**HIGHLIGHT Grows with your child:** separately adjustable seat and foot board

**Design:** chrome-plated metal parts for a particularly high-quality visual appearance

## The all-rounder – RECARO JetSet.

The RECARO JetSet – two chairs in one! From a handy highchair made of high-quality beech wood – by means of the seat cushion reducing function it is suitable for infants from about 4 months and later it can become a shapely and universal chair for adolescents up to 50 kg. What is particularly noteworthy is the mature ergonomic design. There are lots of highchairs available – but RECARO JetSet is the one and only.
